## Our Responsibility

*“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs”*

Gro Brundtland, Our Common Future

This is the most frequently quoted definition which we are striving to harmonize with everything we do. To accomplish this ambition, we have transformed our mindset and the way we approach responsible sourcing and production. This has paved the way to a new and more responsible direction, ultimately defining the future of our business, industry, and global presence.

We have compiled a comprehensive sustainability strategy, which is based on three focus areas: responsible supply chain management, material strategy, and design for conscious consumption.

In order to facilitate this, we’ve also committed to providing more clarity around our communications regarding sustainability, both in the words we choose to use and the level of detail we provide to our community.

There’s still plenty of work for us to do – but together with our Sustainability Lead and external consultants, we’re working to reduce our impact on future generations.

## Our Memberships

Through *Better Cotton* and its Partners, farmers receive training on how to use water efficiently, care for the health of the soil and natural habitats, reduce use of the most harmful chemicals and apply decent work principles.

We strive to use *Better Cotton* for as many products containing cotton as possible as a part of our responsibility strategy.

Leather Working Group is an international multi-stakeholder organization that aims to assess and promote environmental best practice within the leather manufacturing industry.

All our leather products or products with leather details are made of leather from LWG certified tanneries.
