RESPONSIBILITY AT LES DEUX

It's never been more important for brands to reduce their impact, and there are three main ways that we're working towards this at Les Deux.

MATERIALS

As part of our Material Strategy, we choose more responsible materials that have lower negative impact like recycled polyester and organic cotton whenever we can. We're working to reduce our use of virgin materials and multiple fiber mixes and increase our use of mono materials, which are easier to recycle.

We've also cut down on the amount of packaging we use by, for example, folding our T-shirts an extra time so we can use smaller poly bags.

DESIGN

Our goal has always been to design clothing that lasts, both in terms of the production quality and from a style perspective. Clothing that lasts for longer needs to be replaced less often, which is one of the biggest ways that consumers and brands can make a difference.

Our newly launched Rewear program is another big step towards extending the lifespan of our clothes, and it gives customers the chance to swap their old Les Deux clothing for store credit or buy preowned styles for less. It's currently live in Denmark for online purchases only, and we're aiming for a full European launch by Q2 of next year.

SUPPLY CHAIN

You can't reduce your impact if you don't know where you can do better. To help us pinpoint areas where we can improve, we're mapping our suppliers in Tiers 1 and 2 so we can make decisions based on data.

We only work with suppliers who've signed our code of conduct, which includes animal welfare and child labor policies, chemical restrictions, and more.

OUR MEMBERSHIPS

Through *Better Cotton* and its Partners, farmers receive training on how to use water efficiently, care for the health of the soil and natural habitats, reduce use of the most harmful chemicals and apply decent work principles.

We strive to use *Better Cotton* for as many products containing cotton as possible as a part of our responsibility strategy.

Leather Working Group is an international multi-stakeholder organization that aims to assess and promote environmental best practice within the leather manufacturing industry.

All our leather products or products with leather details are made of leather from LWG certified tanneries.
